# Highlights

## 360-degree sound pick-up

Sound pick-up from a 360-degree radius for a perfect recording experience. Meetings can be easily captured.

## DSS Pro, PCM and MP3 recording

The DSS format was developed for use in digital voice recorders, permitting a high compression ratio with little loss of quality while enabling you to store additional information in the file header. The PCM format allows stereo recording in CD-like audio quality and the MP3 format is the common audio format for consumer audio storage, as well as a de facto standard encoding for the transfer and playback on digital audio players.

## Extendable solution

Easily extend the recording range of your PocketMemo Meeting Recorder by simply connecting up to six meeting microphones.

## Innovative meeting microphones

The innovative boundary layer design of the included meeting microphones uses the sound pressure of the table to provide excellent sound and recording quality with a 360 degree sound pickup radius.

## Wire storage

The built-in wire storage in the 360° microphones allows you to adjust the length of the cable to perfectly suit your needs, making sure your desk always looks tidy and professional.

## Elegant metal carrying case

The elegant metal carrying case guarantees highest mobility and safe transportation.

## SpeechExec software

The SpeechExec software organizes the workflow of dictation files and resulting documents between author and transcriptionist and allows you to monitor the status of your work.

## Out-of-the-box solution

The PocketMemo Meeting Recorder delivers excellent sound quality combined with easy-to-use technology right out of the box.

## Exchangeable memory card

Virtually unlimited recording capacity thanks to an exchangeable memory card.

# Highlights

## Automatic download via USB

When plugged in, the PocketMemo Voice Recorder automatically downloads your audio files directly onto the computer.
